

IBS Open Business Integration for Banking

Inject your bank everywhere

Move your bank into the future by embedding your services everywhere using our Open Banking solution based on IBM industry leading platform.

Beyond PSD2

PSD2 is only the first step, but it will help you to build the internal processes, the infrastructure and the partner ecosystem. Our solution, based on IBM API connect, will provide you with all the tools and XS2A API's fully PSD2 compliant while laying the foundation for your future.

Beyond mobile banking

Banking on the go is a must. Modern mobile app is crucial for your success, but how fast you deploy new services and embed your bank into third party solutions is making the real difference. Enabled by IBM platform and our services your bank will be fully capable to tap on fast on any opportunity

Banking in context

Banking in context is a concept that moves you closer to your customers. Banking services are offered just where and when they are needed in a life or a business context - without the bank being present physically or virtually.
